Working smarter

A new knowledge hub – Being an intern with the ITU-T Smart Cities & Metaverse Team is an incomparably exciting and motivating experience for me. With my team's support, I recently launched the Digital Transformation Resource Hub project which demonstrates ITU's commitment to empower cities, industries and everyone by realizing the power of emerging technologies. The Hub aggregates reports, studies and guidelines about emerging technologies from across the web. It is structured across eight sections corresponding to ITU's areas of action for digital transformation, including Artificial Intelligence (AI), Internet of Things (IoT), and the metaverse. I hope the Hub will assist all ITU members in promoting the exchange of technical knowledge and information among government officials, industry representatives and academic experts. By completing this project, I learned a lot about the many different technical standards the ITU is involved in. I encourage you to visit the Hub website, and if you have reports you would like to see published there, please do let me know!

Na Li, Intern, ITU-T Smart Cities & Metaverse Team. Study Group Department (SGD)
